SHH-TE

PALETT TRUCK LIFT SHH-TE

Increase productivity through networking of working processes

EUROCUTTER® Cutting Systems do not only make work easier, but also increase productivity.

Automatic lifting, lowering and automatic loading

Pallet lifts and loading units reduce physical labour. The cutting material is lifted quickly and automatically to the optimal working height and transferred to the High Speed Cutter or other peripheral equipment.

Operator bending is eliminated with an enormous increase of productivity

Machine details SHH-TE

2 in 1 Stacklift and pallet truck lift in one unit

Manuel movable with full load

Very economic

and save due to additional handles

Electrohydraulic automatic lifting/lowering

Eliminating operator fatigue, ensuring continuous work at optimal working height

Integrated battery and charger unit

long life, almost maintenance-free

Quick palette change

due to high lowering speed

Automatic safety cut-off

Integrated power socket

for direct connection to AC

Break

CE-Norm Safety Standard

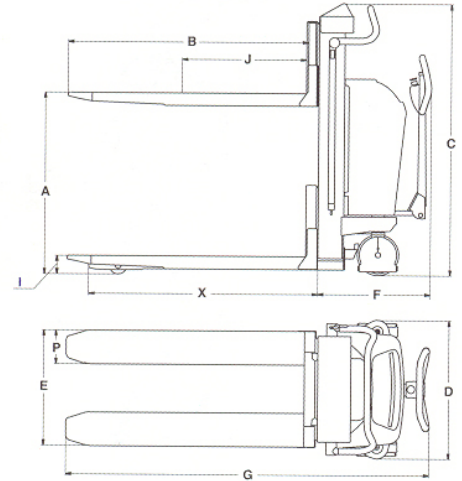

Options:

Different types

fork-lengths from 600 to 1520 mm, lifting heights from 920 up to 3300 mm

EUROCUTTER®		-1150	-800
SHH-TE			
Tragkraft	kg	1000	1000
Lifting capacity	lbs	2200	2200
