

TRANSPORT

AIR TABLES FEL

Increase of productivity through networking of working processes

EUROCUTTER® cutting systems do not only make work easier, but also increase productivity.

Working without symptoms of fatigue by optimal material transport.

Air- and transfer tables as well as gripper systems optimise the transfer of the cutting material before and after cutting.

Air cushions provide floating of material during normal loading and unloading. Gripper transport systems automate the transfer and are used for rear table loading with large formats.

Characteristic features FEL

Easy installation of tables and components in order to make a complete finishing line

Table surface in RESOPAL

Air nozzles made of high grade brass (no plastic)

Small gaps between the air nozzles for optimal transport of the material

Easy exchange of the air nozzles when wearing

Stable base with the possibility of assembling of additional shelves

Efficient air piping system to maximise volume m² of air supplied

Working height is easily adjustable

Options:

- Special sizes available
- Table surface in stainless V2A steel
- Paper stop for backside and side
- Blower
